PURPOSE:

This qualification is intended to enable lay people and /or health care workers to help individuals and/or groups to approach the HIV/AIDS pandemic and any other dread disease in an integrated way so that the condition may be managed satisfactorily.

The care worker will be able to assist those suffering from or living closely with such conditions as HIV/AIDS and/or other dread disease to understand and accept the condition and take positive and necessary steps to enrich the quality of life of the sufferer and deal with the consequences of the pandemic.

A qualified learner will be able to:

- * Communicate with individuals and groups to generate understanding of the HIV/AIDS or other dread disease pandemic.
- * Provide knowledge of the causes and effects of infectious diseases including all sexually transmitted diseases to enable individuals and communities to combat their occurrence.
- * Engage with individuals and groups to apply means to improve own and district health status.

PURPOSE:

The purpose of this qualification is to prepare a learner to operate as an Occupational Health and Safety Practitioner. An Occupational Health and Safety Practitioner serves as a facilitator and advisor to employees and management regarding safety and health aspects in the workplace including the monitoring and inspecting of the workplace and the recording and investigation of incidents and accidents. They also implement and maintain Occupational Health and Safety systems in order to ensure a safe and healthy work environment.

A qualified learner will be able to:

- * Inspect work places and environments to identify the occupational health and safety hazards and determine the risks associated with the work.
- * Facilitate and support actions to eliminate or control hazards in order to minimise risks in a designated work area.
- * Represent the needs of employees with regard to Occupational Health and Safety matters.
- * Participate in the planning and implementation of operational Occupational Health and Safety Management Systems.
- * Monitor and continually improve the effectiveness of operational Occupational Health and Safety systems.
